### There Is No Largest Prime Number

The proof uses reductio ad absurdum.

### **Theorem**

There is no largest prime number.

1 Suppose p were the largest prime number.

• But q + 1 is greater than 1, thus divisible by some prime number not in the first p numbers.

## There Is No Largest Prime Number

The proof uses reductio ad absurdum.

#### **Theorem**

There is no largest prime number.

- 1 Suppose p were the largest prime number.
- Q Let q be the product of the first p numbers.
- ② But q+1 is greater than 1, thus divisible by some prime number not in the first p numbers.

## There Is No Largest Prime Number

The proof uses reductio ad absurdum.

#### **Theorem**

There is no largest prime number.

- 1 Suppose p were the largest prime number.
- 2 Let q be the product of the first p numbers.
- 3 Then q+1 is not divisible by any of them.
- 4 But q + 1 is greater than 1, thus divisible by some prime number not in the first p numbers.
